

**TECHNICAL COMMUNICATIONS  
CERTIFICATES**

The Technical Communications program offers the following two certificates:

- **Technical Communications Specialization Certificate (90-699-1)**

This certificate consists of 12 credits of Technical Specific courses in the Technical Communications Associate Degree program. Courses in the certificate are chosen through consultation with the program's lead instructor to reflect the area of interest/specialization the student wishes to pursue.

- **Advanced Technical Communications Certificate (90-699-2)**

This certificate consists of 24 credits of Technical Specific courses in the Technical Communications Associate Degree program. It is designed for students who desire to complete the majority of course work in Technical Communication but do not need the formal associate degree. Typically, these students have at least a bachelor's degree and/or are currently working as a technical writer and need to expand their skills.
