

Critical Core Manufacturing Skills

The *Critical Core Manufacturing Skills* training program gives your employees the tools they need to meet the changing demands of the modern manufacturing environment and deliver consistently high performance.

Combining powerful new training content with real-world application, each module focuses on a specific skill in one of four key areas—productivity, problem solving, teamwork, and adaptability. Modules can be offered as single sessions or grouped into a customized training package geared to your business objectives, timeline, and budget.

Visit www.wtcsystem.edu or contact your business and industry services representative to learn more about this exciting new program.

Core Adaptability Skills

With the rapid pace of change in manufacturing today, employees need to think on their feet and adapt quickly to shifting expectations. The *Core Adaptability Skills* modules help workers respond quickly to unexpected events, contribute to innovative solutions, and think creatively.

Module 10: Demonstrate Integrity

Participants learn to demonstrate trustworthiness by being honest, dependable, and reliable. Learning activities help participants learn to apply ethical standards of industry to workplace conduct and consistently produce high quality work.

Module 11: Demonstrate a Positive Attitude

Participants learn to maintain control of their attitudes, accept constructive criticism in a positive manner, react to negativity in a neutral tone, volunteer for tasks, and be better prepared for changing work responsibilities.

Module 12: Adapt to Change

Participants learn to apply a change model and its methodology to the manufacturing environment. Learning activities help participants respond quickly to unexpected events, contribute to innovative approaches, and think creatively. Participants are encouraged to adopt a personal philosophy incorporating lifelong learning as a means of maintaining adaptability.

Target Audience

The *Core Adaptability Skills* modules are designed for all members of the production team.

Typical Time Investment

Each module is 4 hours and can be customized according to the needs of the participants.

Delivery Format

The training design is interactive with practical skill applications, individual and small group exercises, and real-life examples.
