Element	Description	Specifications				
1. Process	Our process will be to identify who are our stake holders are and what they are currently using as a process to purchase software and equipment. We will hold focus groups to identify the needs of the customers and identify gaps. We will then create a standard process to procure software, IT equipment and supplies for IT equipment. The process will involve getting buy-in from key stakeholders, developing and documenting a process, and educating staff.					
2. Project Description	Define a process for the procurement of Staff/faculty IT equipment and software.					
3. Objective	Create an efficient, cost-effective, standardized process for procurement of IT equipment and software for staff and faculty	Metrics	Current	GOAL	% Improve.	Units
		Metric 1				
		Metric 2				
		Metric 3				
4. Process Scope	Procurement of IT equipment and software for Staff/faculty. Software is defined as any product that can be installed onto a computer. IT equipment will be defined as we move through this process and review and asses the needs of the college. Supplies will be defined as non software and IT equipment supplies such as USB drives which can be purchased in bulk for a discount rate.
