Advanced Manufacturing Technology (10-664-2)

Advanced Manufacturing Technology combines mechanical, electronic, and information technology into a single discipline that crosses the traditional boundaries of a skilled technician. Advanced Manufacturing technicians need a broad understanding of mechanical and electrical principles, and the use of data to optimize the manufacturing process through intelligent automation. These industry certifications are embedded in the program: Snap on Hand tool Safety, Snap on Multimeter, OSHA 10, and Starrett Precision Measurement.

Program Learning Outcomes

Graduates will be able to:

- 1 Apply state and national safety rules to the manufacturing systems environment.
- 2 Analyze automation within a complex manufacturing system.
- 3 Manage advanced manufacturing systems for operational efficiency and cost control.
- 4 Analyze technical specifications for implementation of manufacturing systems, modules, and components.
- 5 Explore a Proportional Integral Derivative (PID) control system to achieve a desired outcome in a manufacturing outcome.
- 6 Integrate industrial control systems into manufacturing processes.
- 7 Apply electronic principles to devices within a complex manufacturing systems.
