

2023-2024 Certificate

Certificate: PERMACULTURE DESIGN (90-001-7)

Credits: 3 Credits

Description: Permaculture draws from several different disciplines including organic farming, agroforestry, sustainable community development, alternative/natural building and applied ecology. This course will teach participants techniques to reduce dependence on fossil fuels and will increase the long-term sustainability of their homes and communities. Students will learn ecological principles needed to capture storm water, reduce chemical use, save labor and materials, and integrate organic food production into urban landscapes. This course involves a combination of lecture, online videos/webinars, hand-on activities, and field trips.

Related Program: Landscape Horticulture

The sequence shown is the recommended path to completion. Courses will be scheduled in the terms indicated here.
All courses should be taken in the order shown to help you stay on track and graduate according to your academic plan.
Courses in this program may be offered in a variety or combination of formats (for example: in-person, video conferencing, online, etc.).
