Student club to hold
Racine Campus computer clinic

</div>

Having problems with your computer? Computer slow – and you need it to speed up?

Gateway Technical College's student chapter of the Association of Information Technology Professionals will hold a public computer clinic Aug. 13 with computer check-in 9 a.m. to noon (or until capacity is reached), and pick up from noon to 2 p.m., in Superior Room 102 of the Racine Building on the Racine Campus, 1001 S. Main St.

Computers will be worked on in a first-come, first-served basis until capacity is reached. All computers must be picked up by 2 p.m.

Students can assist with the following:

- Update PC operating systems

- Check for viruses

- Diagnose Internet access issues

- Perform file and back up services

The clinic is a fund-raiser for the student club. Participants are encouraged to contribute $20 for each computer which is worked on.

The Superior Room can be accessed through the eastern entrance to the Racine Building next to the northeast parking lot of the campus.

Many members of the community have benefited from participating in the clinic. The event also allows students to give back to the community while honing the skills they will use once they enter their career.

Gateway Technical College collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the changing needs of students, employers and communities.
