**Nicole Oberlin named
Gateway District Ambassador**

Nicole Oberlin was named Gateway Technical College's 2022-2023 District Ambassador and will now be the student voice of the college to communities in Kenosha County, Racine County and Walworth County as well as at speaking engagements during public events held by the college each year.

Oberlin was initially selected as the Elkhorn Campus Ambassador. Other 2022-2023 Campus Ambassadors selected include Taylor DeVincentis for the Kenosha Campus and Lizbeth Ruvalcaba for the Racine Campus. District Ambassadors are chosen from the field of three campus ambassadors.

"The campus ambassador program is very important to the college, to our academic programs and to our students," said Gateway Technical College Executive Vice President and Provost Zina Haywood.

"It is important to recognize student academic achievement and outstanding character. Recognizing the student 'stars' promotes the college's values and highlights teaching excellence and student success. The students

nominated for the campus ambassador program are role models for current and future students.”

Oberlin, a dual admission General Studies program student, will represent Gateway at a statewide leadership conference of District Ambassadors from each college of the Wisconsin Technical College System and will also receive a Gateway Technical College Foundation tuition voucher.

DeVincentis is enrolled in the college’s Greenhouse Operations program and Ruvalcaba in the Business Management program. They will also receive Foundation tuition vouchers and serve as the student voice to communities and the college from their respective campuses.

Nominees are selected based on their outstanding character, positive attitude, leadership, personal goals, communication skills, enthusiasm and self-confidence.

Gateway Technical College’s mission is to deliver industry-focused education that is flexible, accessible and affordable for our diverse community. The college collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the changing needs of students, employers and communities.
