**Gateway to hold annual NitroX  
vehicle summer camp**

Gateway Technical College still has some open seats for its annual, exciting, hands-on summer camp at its Horizon Center for Transportation Technology. The NitroX summer camp gives middle-schoolers the chance to build and test drive nitro-methane powered remote controlled trucks – and race their own truck at the end of the week.

Participants will learn how the trucks work, as well as design and paint their own truck body and compete in remote control drag-style and course-style races on Friday, Aug. 6. In addition to working on the trucks, they will also be introduced to transportation careers as well as take field trips to area dealerships Aug. 2-Aug. 5.

To register: [www.gtc.edu/summercamps](http://www.gtc.edu/summercamps) Questions? Email [hoffmanj@gtc.edu](mailto:hoffmanj@gtc.edu).

Cost is \$125, and the camp includes lunch, snacks, beverages, a T-shirt and the truck body campers design and create.

Gateway Technical College's mission is to deliver industry-focused education that is flexible, accessible and affordable for our diverse community. The college collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the changing needs of students, employers and communities.
