**Gateway to hold simulated emergency event on Kenosha Campus**

Gateway Technical College will hold its annual simulated disaster training event March 11 at the Inspire Center and nearby parking lot on its Kenosha Campus, 3520-30th Ave.

Students will take part in a pre-briefing from 8 a.m. to 9 a.m., with the simulated disaster happening 9 a.m. to 11:30 a.m.

The interprofessional simulation day, branded as Red Hawk Rescue, brings together students from four programs to use the skills they've gained in their coursework in a simulated emergency situation: Nursing, Physical Therapist Assistant, Surgical Technology and EMS/Paramedic programs.

The simulated crisis scenario – with Gateway students playing roles as patients – will be a blast from a gas pipe leaking into the Inspire Center. Students will triage care, practice how they would communicate with other emergency service personnel and make sure patient safety remains a priority through the transfer of care.

Gateway Technical College's mission is to deliver industry-focused education that is flexible, accessible and affordable for our diverse community. The college collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the changing needs of students, employers and communities.
