**Gateway to hold  
Women in Manufacturing event**

Gateway Technical College will hold its annual Women in Manufacturing event 8:30 a.m. to 2 p.m. Oct. 16 at its SC Johnson iMET Center, 2320 Renaissance Blvd. Sturtevant. The event is a forum designed to introduce women to the number of rich and family-sustaining careers in manufacturing.

The event provides a way to explore careers fields which are not traditionally held by women but have great earning potential, such as computer numeric control operator, advanced manufacturing technician, mechanical technician and electrical service technician.

The event will include a tour of the college's SC Johnson iMET Center, a student and career panel discussion, experts on hand to answer questions and provide information on Gateway's programs and manufacturing careers as well as other activities such as building a toolbox, a scavenger hunt and the opportunity to do a welding project. While this event is focused on opportunities for women, all are welcome to attend.

To register, go to [www.gtc.edu/Women-in-Manufacturing](http://www.gtc.edu/Women-in-Manufacturing).

Gateway Technical College's mission is to deliver industry-focused education that is flexible, accessible

and affordable for our diverse community. The college collaborates with communities in Kenosha, Racine and Walworth counties to ensure economic growth and viability by providing education, training, leadership and technological resources to meet the changing needs of students, employers and communities.
