## K12 Virtual Learning Partnership

[vanguard.gtc.edu](http://vanguard.gtc.edu)

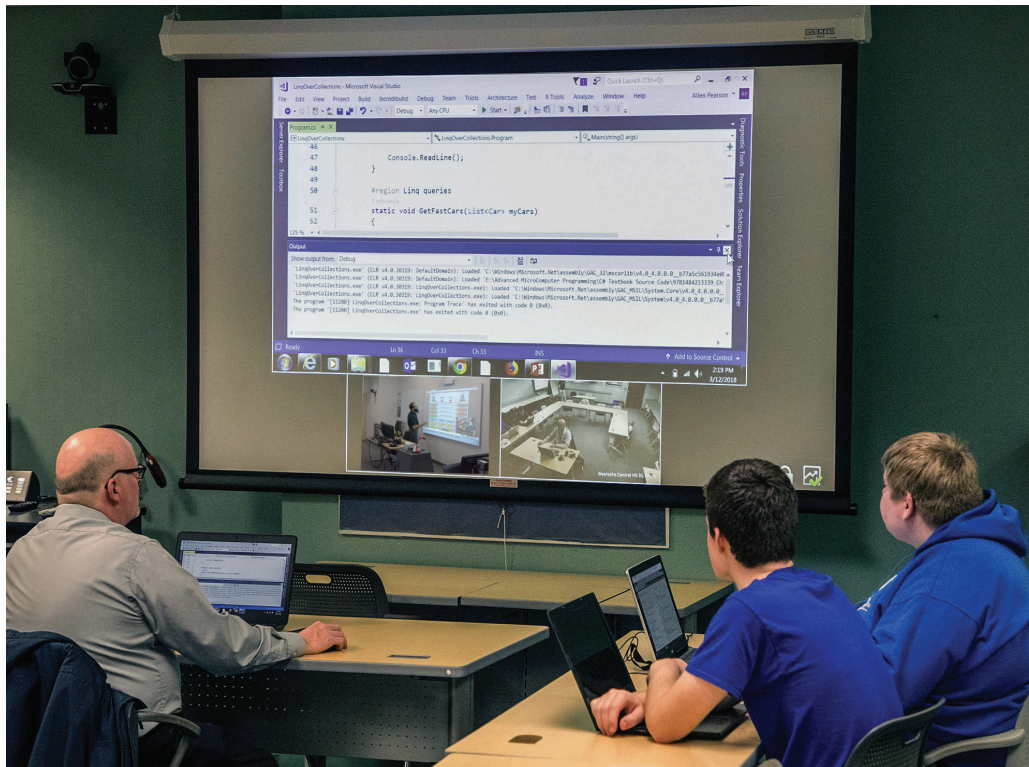

# What is VANguard?

VANguard is Gateway's virtual academic network—a collaborative partnership with area high schools to deliver curriculum over a state-of-the-art videoconferencing system. VANguard offers multiple curriculum options, including regional courses from participating high schools, Gateway Technical College courses, and WADEN\* courses. The partnership is facilitated through Technical Assistance Contracts between participating schools and the college.

VANguard technologies also facilitate enrichment opportunities like virtual field trips or fully customized learning experiences through our partner, Transcended Educational Collaborations (TEC). VANguard is the result of 20 years of experience in delivering instruction using distance education technologies that meet the needs of our partner institutions. Technical support and scheduling are provided by Gateway Technical College. Our technology offers instructors the ability to record their classes for later review and playback by their students.

Our partner schools are encouraged to use the video conference equipment provided to conduct staff development training, to conduct meetings or for other uses of the technology. Gateway Technical College offers an expanding array of college-level offerings over the network. We are proud to serve over 600 students in VANguard classes in any given year. We hope you'll join us.

*\*WADEN is the Wisconsin Association of Distance Education Networks*

## Benefits for VANguard partners

**Access to college-level and high school-level courses unavailable at your school**

**Technical support from Gateway Technical College**

**Enrichment opportunities including virtual field trips and guest speakers**

**Course scheduling and coordination**

**Access to state-of-the-art video and online technology**

**Access to specialized courses for advanced students**

**Enhanced access to career and technical education opportunities**

**Professional development opportunities for your teachers and counselors**

**Access to recorded video classes**

**Networking with your peers to share best practices around distance learning**

**Access to a shared online learning management system for Gateway classes**

**Access to remote admissions and advising sessions for your students**
